24.39.30 – RULES OF BUILDING SAFETY (BUILDING CODE RULES)

DOCKET NO. 24-3930-2401 (NEW CHAPTER, FEE RULE)

NOTICE OF RULEMAKING – ADOPTION OF TEMPORARY RULE

EFFECTIVE DATE: The effective date of these temporary rules is April 23, 2024.

EXPIRATION DATE: The expiration date of these temporary rules is July 1, 2024.

AUTHORITY: In compliance with Sections 67-5226, Idaho Code, notice is hereby given this agency has adopted a temporary rule. The action is authorized pursuant to Sections 67-2604(1), Idaho Code.

DESCRIPTIVE SUMMARY: The following is the required finding and concise statement of its supporting reasons for adopting a temporary rule:

During the 2024 Legislative Session, the Idaho Legislature passed House Concurrent Resolution 48, which approved the changes submitted by the Building Code board. However, these rules have existed only as temporary for the past several years and thus expire upon sine die. House Bill 767, which makes all approved rules effective July 1, was also passed and signed into law during session. These temporary rules codify the changes done as part of the negotiated rulemaking process and as approved by the Legislature until the final rules can take effect on July 1, 2024.

TEMPORARY RULE JUSTIFICATION: Pursuant to Section(s) 67-5226(1)(a), Idaho Code, the Governor has found that temporary adoption of the rule is appropriate for the following reasons:

Protection of the public health, safety, or welfare and to confer a benefit.

FEE SUMMARY: Pursuant to Section 67-5226(2), the Governor has found that the fee(s) or charge(s) being imposed or increased is justified and necessary to avoid immediate danger and the fee(s) is described herein:

The fees or charges, authorized in the sections of Idaho Code referenced below, make up the board’s budget and thus relies upon the existence of these fees or charges to meet the state’s obligations and provide necessary state services. Failing to reauthorize these temporary rules would create immediate danger to necessary state services that are statutorily mandated by the Building Code Board. The temporary rules do not change the current fee schedule.

The following fees are established in accordance with the Sections 39-4107, 39-4112, 39-4113, Idaho Code, and relate to fees to purchase permits or for the performance of inspections on various types of construction installations:

Technical Service Fee. One hundred dollars (\$100) per hour.

Building Permit Fees. The determination of value or valuation will be made by the administrator and includes the total value of all construction work for which a permit is issued.

A person, firm, association, partnership or corporation which is in the business of listing or labeling and which maintains a periodic inspection program on current production of listed materials, and which makes available, not less frequently than annually, a published report of such listing in which specific information is included that the product has been tested to nationally approved standards and found safe for use in a specified manner. (4-23-24)T

02. Minor Alteration. The following definition is used for the purpose of administering annual permits. (4-23-24)T

a. Minor alterations shall include, but are not limited to, the following: partition walls constructed within a defined room; relocation of or existing openings or installation of new doors and windows in non-load bearing walls and not in construction meant to compartmentalize fire; window replacement in unaltered existing openings; roof repairs involving installation of less than one hundred (100) square feet of new roof covering; and new suspended ceilings that are not part of a required fire resistive assembly. (4-23-24)T

b. Minor alterations shall not include: work that alters the fire resistive characteristics of the building or fire suppression systems; work that creates new openings in construction meant to compartmentalize fire such as fire walls, fire barriers, fire partitions, smoke barriers, smoke partitions, horizontal assemblies, shaft enclosures, stair enclosures; work that increases the floor area or height of the building; work that changes the structural load path of the building for gravity or horizontal loads; work that reduces the thermal resistant capacity of the building envelop; changes in the occupancy classification of the building or space; increases in the floor loads. 200. INTEGRATED DESIGN AND FUNDAMENTAL COMMISSIONING OF PUBLIC SCHOOL FACILITIES.

01. Technical and Educational Information. Technical and educational information related to integrated design and fundamental commissioning in the form of the American Institute of Architects Integrated Project Delivery Guide; Portland Energy Conservation, Inc. (PECI) Commissioning Guides; ASHRAE Guideline 0-2005-The Commissioning Process; and the Northwest Energy Efficiency Alliance Integrated Design Special Focus on Energy Performance Guide is available on the Division's. A building commissioned under the prescriptive approaches defined by any of the above-named national organizations is deemed to have completed the Fundamental Commissioning process. (4-23-24)T

02. Commissioning Agents. The Division has compiled and made available for public examination a list of all known third party building commissioning agents in Idaho and its contiguous states. The Division has ensured that all such commissioning agents appearing on this list have been certified by the Building Commissioning Association (BCA) or other similar certifying entity. (4-23-24)T

03. Annual Optimization Review. (4-23-24)T

a. The third-party commissioning agent who performed the initial fundamental commissioning for a public school building must provide the school district with a written report identifying the systems which will be subject to the Idaho Code Section 33-356 annual optimization review and identifying the system requirements and/or other relevant measuring criteria. The written report shall, at a minimum include the following: (4-23-24)T

i. Verification that the heating, ventilation, and air conditioning (HVAC) systems, controls, dampers, valves, sensors and other equipment used to control the system are functioning as they were at the commissioning of the building; (4-23-24)T

ii. Verification that the lighting controls are functioning as they were at the commissioning of the building; and (4-23-24)T

iii. The requirement that any changes made to any of the controls contained on the agent's list after the initial commissioning be re-set back to the commissioned settings unless it can be demonstrated that the new settings result in greater energy efficiency. (4-23-24)T

b. The annual optimization review shall be performed by persons qualified to make the required determinations and adjustments. (4-23-24)T

c. Following the annual optimization review, the school district shall submit to the Division written verification indicating (1) the systems identified by the commissioning agent, including those identified in this Section are functioning as they were at the initial commissioning; and (2) identifying the persons performing the optimization and their qualifications. c. Add the following as exception number 7 under Section C403.5 Economizers (Prescriptive): 7. Unusual outdoor air contaminate conditions – Systems where special outside air filtration and treatment for the reduction and treatment of unusual outdoor contaminants, makes an air economizer infeasible. (4-23-24)T

e. Section R402.4.1.2. Add the following exception: Visual Inspection. The Permit Holder will determine at the time of permit application the method of determining building envelope tightness. A visual inspection shall be considered acceptable in lieu of testing when the items listed in Table R402.4.1.1, applicable to the method of construction, are field verified. (4-23-24)T

f. Add new Section R402.6: R402.6 Residential log home thermal envelope. Residential log home construction shall comply with Section R401 (General), Section R402.4 (Air leakage), Section R402.5 (Maximum fenestration U-factor and SHGC), Section R403.1 (Controls), the mandatory sections of Sections R403.3 through R403.9, Section R404 (Electrical Power and Lighting Systems), and either 1., 2., or 3. as follows: 1. Sections R402.2 through R402.3, Section R403.3.1 (Insulation), Section R404.1 (Lightning equipment), and Table R402.6 (Log Home Prescriptive Thermal Envelope Requirements by Component). 2.
